RC22ER SERIES

RAIL CUTTER - RC22ER -

The European railway covers approximately 350.00 km. The construction and maintenance of railway tracks is an important market. To respond to the ever growing demand for cutting railroad tracks, FRD presents their first rail cutter model.

The RC22ER is designed for use on excavators from 21 to 35 ton operating weight. The RC22ER is used to cut high tensile bars.

Extreme long service and maintenance intervals have been achieved. The complete body of the RC22ER is made of Hardox and has undergone a special heat treatment so that the body is produced entirely free of tension. A higher mechanical strength is ensured.
